

Be Careful, KEBA Fasteners
are Uniquely HOT!

HOTFORM

KEBA Hot Bolts are hot forged from all common materials including stainless, acid resistant and heatproof (inductive hardening, case hardening, quenched and tempered) steel.

PRODUCTION CAPABILITIES

Diameter range of M 12 - M 80 with lengths reaching up to 800 mm. Tailored manufacturing according to specific standards, drawings and samples.

SURFACE

KEBA Fasteners can be coated according to your requirements such as galvanized, phosphatized, or hard chrome plated. Chrome VI free coatings for the automotive industry (e.g. Geomet Plus, Delta-Protect) is also available.

EXTENSIVE RANGE

Reduced-shaft bolts, pan head screws, square-head bolts, fit-bolts, hexagon head bolts, hexagon socket head cup screws, wheel bolts, bearing bolts, threaded bolts, clevis pins with head and many more which can be tailored to customer specifications according to the model or drawing.

- Reduced-shaft bolts
- Pan head screws
- Square-head bolts
- Fit-bolts
- Hexagon head bolts
- Hexagon socket head cup screws
- Wheel bolts
- Bearing bolts
- Threaded bolts
- Clevis pins with head

and many more which can be tailored to customer specifications according to the model or drawing

KEBA Hot Bolts are serviced in rail vehicles, utility vehicles, agricultural machines, track laying machines automobile manufacturing, in axle construction, gear manufacturing, the construction of heavy machinery and in many other fields where high performance is required.
