

Providing Cost  
Reduction Through  
Open-Die Technology

# OPTECH

With innovative technology and optimal manufacturing processes, KEBA is able to cater to any special customer requirement.

KEBA is most notable for its Cold-Forming production line and is recognized as a specialist in this area for delivering solutions and products tailored to your needs.

**With our Open-Die Technology, we can offer Turned Parts as Cold Formed.**

This provides you with not only a cost-efficient product due to lower material consumption, but higher tolerances, variable shapes and designs, various raw materials and most importantly, quicker production times.

## FEATURES AND BENEFITS

- Ability to meet tight tolerances
- Optimized product strength
- Resource efficiency
- Limitless product geometries
- High process speed
- Overall cost effective
