

Thread forming
Screw for Metal

DIN 7500 FASTENERS

Specifically engineered to lower in-place fastening costs for various applications while providing optimal joint performance.

This thread forming screw is in accordance with DIN 7500 for installation into malleable materials, which:

- Eliminates the need to pre-tap the nut member
- Reduces problems associated with assembling screws and bolts into pre-tapped holes, such as cross-threading

FEATURES AND BENEFITS

- Trilobular thread shape
- Improves and expedites thread engagement and the initial thread forming
- Resists loosening caused by vibrations
- Provides a higher uniform drive
- Prevents internal thread stripping

INDUSTRY APPLICATIONS

- Automotive
- Industrial
- Construction
- Machine
- Electronic
